Track Trailer products are renowned for their unique, eye catching design & sleek industrial lines, but what lies beneath is a highly functional & well thought out van. At Track Trailer our aim is to constantly exceed your expectations in performance, functionality & clever use of space.

This single minded focus is apparent wherever you look, like our unique & unmatched **'MC2' suspension**, or the quick & easy set-up choices to suit your camping lifestyle.

Track fully back all its products with an industry leading 'genuine off road' warranty, courtesy of more than 25 years experience. Our products will continually evolve, this way Track can push forward & continue to earn the praise of its owners, the press & ultimately yourself.

We invite you to compare, ask us questions and delve into the Tvan world of **unique and functional off-road camping.**

The Tvan camping advantage

Imagine sleeping securely under a hard roof not 'flapping canvas.' Protected from insects and the elements by strong solid walls that provide great insulation from noise, hot sun, cold nights and wind. When the tent is deployed (doubling your living space) it's secured to a fold out 'hard floor', so you'll be up off the ground, dry and secure. Most importantly, when it's time to move on your bed will remain 'made up' & dry, even after a wet pack-up.

- Full queen size foam mattress with option to upgrade to innerspring.
- Fabric lined roof for insulation & comfort.
- Large storage areas in the cabin & under the bed
- Large tinted windows.
- Double glazed roof hatches with insect screens & blinds for privacy & airflow.
- 4.8 metres (16ft) of usable cabin & tent living area.
- Easy one person tent set up & pack up

The Tvan deck can be used for living space, gear storage & even a place for the kids to sleep on a quick overnight stop.

Living Options

- The wide range of options can all be retro-fitted. The benefits are endless, because you can tailor suit your Tvan to match your ever changing lifestyle.

For example: extend the living space with the family room, or choose the ensuite for your shower & toilet. Both set up in minutes thanks to their simple 'zip on' design.

- All our canvas products are top quality Australian made & designed to last

Kitchen Setup

- Stainless steel kitchen & workbench with built in windshields
- Located on kerb side for safe roadside access
- Twin burners & BBQ plate
- Extra sturdy 'slideout' design- no support legs needed
- 65 litre pantry – accessible from both sides
- Sink, electric water pump & large cutlery drawer (optional on Yulara)

Every Tvan model delivers the same advantages

All Tvals share the same rugged off-road 'DNA'. Based on the same chassis, suspension, brakes, coupling etc, the Tvan utilises durable riveted steel & aluminium construction, which has been proven in the harshest outback conditions. Using thick automotive seals & compression catches the cabin & lockers remain dust proof & water free throughout. The suspension can be customised to match the wheel & tyres on your tow vehicle.

From this common platform we offer you 4 models to suit your tow vehicle's capabilities, camping preferences & budget. Our Yulara & Tanami are more compact, while the Canning & Murrانji offer you around 25% more cabin space & additional outside storage options.

Yulara

The Yulara is where our Tvan range begins. It offers full flexibility in tow vehicle choice, including lighter SUV's thanks to its reduced ball weight achieved via weight redistribution (for example the spare wheel is stored under the van). The Yulara is hugely flexible both in storage & options. You can easily integrate your existing camping equipment, but as your needs change the van can be upgraded from the extensive options list.

Tanami

The Tanami is the next step up, offering a fully integrated kitchen, combined with extended battery, water & spare fuel carrying capabilities. The Tanami has all the essentials you'll want to use on a daily basis, but nothing that complicates what camping is all about.

Canning

Although the Canning is the beginning of the larger bodied Tvals, it's a very well appointed model featuring a large awning roof, interior refinements & upgraded electrics. The Canning is for the camper / tourer who likes to vary how they travel, from quick overnight stops to week long stays.

Murrانji

The Murrانji shares the same body & build as the Canning but we've added the most commonly selected touring options, for example the second water tank & solar panel. You also enjoy a quality sound system & a host of other standard features that make the Murrانji our most comfortable & capable 'straight off the line' Tvan.

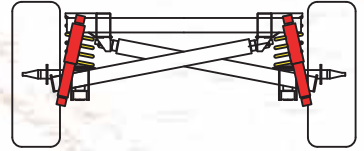

***Please see the options list for spec's & further details.**

Chassis & Suspension

All Tvans are built on our compact & exceptionally strong 'hot dipped galvanised' chassis. Our 'asymmetric link' independent suspension is unique in that it maintains wheel contact with the ground even over severe corrugations or deep washouts, thanks in part to the tough cross link that prevents back steer. The long 250mm wheel travel is achieved by the custom springs & shockers which when coupled with the front trailing arms helps the van to track straight behind the tow vehicle.

The MC2 suspension takes its name from the performance rating applied by the Australian Military during testing. 'Mobility Category 2' is the highest rating an unpowered vehicle can be classified as. This remains unmatched by any other trailer suspension system & delivers a significantly softer & flatter ride.
